AMAN KUMAR SINGH

Full Stack Software Developer

+91 78560 23195 | amanku7977@gmail.com | LinkedIn | GitHub | Punjab, India

PROFESSIONAL SUMMARY

Full Stack Software Developer with 3+ years of experience building secure, scalable web applications using Node.js, React.js, and Vue.js. Delivered end-to-end solutions for international clients across the U.S., Saudi Arabia, and Bulgaria in healthcare, maritime, insurance, and e-commerce domains. Strong expertise in REST API development, AWS cloud services (KMS, Secrets Manager, S3, EC2, SES, Bedrock), PHI data protection and field-level encryption, and AI-powered features using OpenAI and Amazon Bedrock. Experienced in third-party integrations (Google Places, AIS, Compliance APIs, SendGrid), database and query optimization, security remediation, and Agile delivery within cross-functional teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++

Frontend: React.js, Vue.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (S3, EC2, SES, KMS, Secrets Manager, Bedrock), Git, GitHub

Security: Field-level PHI Encryption (AWS KMS), Audit Logging, Session Management, Secrets Management

Integrations: OpenAI API, Amazon Bedrock, Google Places API, AIS API (Kpler), Compliance APIs (Kpler), SendGrid

Analytics & Tools: Google Tag Manager (GTM), Google Analytics 4 (GA4), Postman, Jira, Asana

Methodologies: Scrum, SDLC

AI Tools: ChatGPT, Claude, Antigravity

PROFESSIONAL EXPERIENCE

Associate Software Developer | smartData Enterprises *Oct 2023 – Present*

- Contributed to 4+ international client projects across the U.S., Saudi Arabia, and Bulgaria, delivering scalable full-stack systems aligned with diverse business and compliance requirements.
- Collaborated with cross-functional Agile teams to ensure on-time delivery across the full SDLC, from requirements gathering and system design to deployment and post-launch support.
- Integrated third-party APIs (AIS, Compliance, Google Places, OpenAI) and cloud services (AWS S3) to extend platform functionality and improve data reliability.
- Optimized database queries, enhanced API performance, and improved backend logging (URI, method, IP, controller tracking) to support scalable, production-grade applications.

KEY PROJECTS

BirthTracks — Healthcare Birth & Patient Records Platform *Jun 2026 – Present*

Role: Full Stack Developer | *Node.js, React.js, MySQL, AWS (KMS, Secrets Manager, Bedrock), SendGrid*

- Led a platform-wide security remediation covering PHI protection: implemented audit logging, database-backed session management, and environment-based configuration with AWS Secrets Manager, and rotated security keys.
- Designed and built a field-level PHI encryption pipeline using AWS KMS, including re-encryption migration crons with dry-run mode, rollback timestamps, verification passes, and failure logging; migrated 590k+ Births and Patients records.
- Improved performance of large list views and exports through KMS decrypt-cache prewarming, chunked data loading, indexed query optimization, and request-level telemetry, eliminating multi-second page loads.
- Migrated the AI-powered CSV import (automated field mapping of patient data) from Azure OpenAI to Amazon Bedrock's OpenAI-compatible API, with TLS hardening and IAM-scoped access.
- Resolved critical reliability issues including patient-merge race conditions, session-timeout misconfiguration causing premature logouts, and AWS KMS clock-skew signature failures.

Golden Shield — Port & Vessel Management Platform *Nov 2025 – Jun 2026*

Role: Full Stack Developer | *Node.js, React.js, AWS S3, AIS API, Google Places API*

- Led full-stack development of core modules: Vessel Visit Lifecycle, Invoicing & Payments, Roster Management, Port/Company Administration, Operational Services, and Movement Reports across a multi-role architecture.
- Built an end-to-end Visit Management system supporting add/edit/delete operations, parent-child movement tracking, AIS & Compliance API integration, and dynamic service mapping.
- Standardized AWS S3 storage with a structured folder hierarchy and custom file-naming strategy to ensure organized, secure cloud file management.
- Improved system scalability and reliability through database migrations, optimized API calls, enhanced request logging, and performance-focused UI improvements.

Ambayo — Online Marketplace Platform *Jun 2025 – Nov 2025*

Role: Full Stack Developer | *Node.js, React.js, ChatGPT API, GTM, GA4*

- Developed a scalable seller rating and review module with backend-driven weighted scoring (1–10 scale mapped to 5 stars), dynamic color classification, and conditional review validation.
- Integrated the ChatGPT API to verify buyer-seller conversation authenticity before triggering review invitations, ensuring genuine and abuse-free feedback.
- Implemented full platform localization across 114+ languages using ChatGPT-powered translation for static pages (About Us, How It Works, Support, etc.).
- Integrated Google Tag Manager (GTM) and Google Analytics 4 (GA4) with custom marketplace events (sign_up, post_ad, start_chat, promote_ad) to enable funnel tracking and data-driven optimization.
- Optimized database queries and backend logic to improve marketplace performance and reduce API response times.

Underwriting Portal — Auto Insurance Platform *May 2024 – Jun 2025*

Role: Full Stack Developer | *Node.js, React.js, MySQL*

- Contributed to backend and frontend development of an auto insurance underwriting portal, streamlining risk assessment and policy evaluation workflows.
- Designed and developed dashboard features using MVC architecture, including report listing, advanced search, sort, and filter capabilities for AI UW, EPR, PPR, and Audit Reports.
- Assisted with backend development for data storage, risk scoring logic, and automated report generation based on underwriting decisions.

IntellCOMM — Business Communication Platform *Feb 2024 – Apr 2024*

Role: Full Stack Developer | *Node.js, Vue.js, MySQL*

- Built a secure, multi-channel business communication platform supporting appointment scheduling, document management, and staff-client-third-party messaging with full audit trails.
- Implemented an appointment system allowing advance and same-day bookings with manager-controlled staff allocation.
- Developed a messaging module with audit trail logging to ensure accountability and communication standards across roles.

EDUCATION

B.Tech in Computer Science Engineering *Nov 2020 – Jun 2024*

Swami Vivekanand Institute of Engineering & Technology, Punjab **GPA: 8.22 / 10.0**

CERTIFICATIONS

- SQL Essential Training — LinkedIn Learning
- C++ Essentials — Scaler
- Claude 101 — Anthropic

ADDITIONAL INFORMATION

- Open to relocation or full-time remote work globally.
- Passionate about learning new technologies and software architecture concepts.
- Languages: English (Fluent), Hindi (Fluent).
